Grade Levels:6th - 8th Grade, Grades K-12CCSS Code(s):L.6.4a, L.7.4a, L.8.4a Teaching children to read is an important skill they'll use for the rest of their lives. When children need extra practice using their reading skills, it helps to have worksheets available. You can find an assortment of printable reading worksheets for free and for sale on several websites. Teacher Websites There are several teacher websites where you can download reading comprehension worksheets they created for their classrooms. One advantage of using these worksheets is that they are designed for specific reading levels and have been tested in a classroom. Many follow the formats used on state and local tests that measure reading ability. The teachers sometimes include anecdotal notes and tips for making the worksheets more effective. Publisher Websites Publishers of textbooks, education research and professional development books sometimes offer worksheets on their websites. These worksheets usually are samples from the books they publish so that you can preview the content. Book publishers sometimes produce worksheets to pair with their books. If you're looking for additional practice while reading a specific book, check out their websites for graphic organizers and comprehension questions. You also can purchase collections of traditional and homeschool worksheets in digital books arranged by reading level. Many of these collections are themed by genre or subject matter. This makes it easy to select worksheets that match the child's interest or to build background knowledge in specific areas. Teacher Resource Sites Whether you're a teacher or a parent, teacher resource websites are another option for finding reading worksheets. Some sites like Teachers Pay Teachers let teachers upload worksheets they've created and offer them for sale. Others are more collaborative and give teachers a place to share best practices and materials with others. If you're looking for materials to use in a homeschool setting or for after-school practice, check out these sites. In addition to the worksheets, you get access to a community of educators who can help you find the right materials for your children. Literacy Programs Even for-profit literacy programs offer free worksheets for parents and teachers. Although they're usually designed for use with the company's program, you can use them for other lessons. For example, the company Reading Horizons has downloadable phonics worksheets that work with its digital phonics program and face-to-face lessons. English learner sites are other good sources. Because these programs are geared toward children learning the English language, they incorporate social studies and science lessons along with the reading skills. Nonprofit Literacy Groups Organizations like ReadWorks and edHelper have reading comprehension worksheets available on their websites. You can find reading passages with question sets and vocabulary support to help children practice and improve their reading skills. On the ReadWorks website, you can search for worksheets by grade level, text type and topic. This makes it easy to find worksheets that meet the child's specific needs. Try switching the words and see if the sentences make sense. Use the form of the leading words for this section. They will be your guide. Put more into your sentence makers and see if you get what is meant be the use of each word. Read each sentence. Use the context clues to help figure out the meaning of the underlined word. Fill in the circle for the correct answer. Find out what word would best replace the word in the sentence, if you had to. Which word is the meaning of the underlined word? These are the more difficult words in this section. A context clue is information that appears near a word or phrase and offers direct or indirect suggestions about its meaning. Using context clues allow you to figure out a word you do not know without having to use a dictionary. Use the words around the word you do not know to help you learn the meaning. The student must read the sentence and sentences around the confusing word to get an idea of what the words they do not know means. This is using context. Often, there are clues around the word you do not know that helps give you the meaning. Here is a graphic preview for all of the context clues worksheets. Calculating simple interest is an essential skill for anyone who maintains a bank account, carries a credit card balance, or applies for a loan. The free printable worksheets in this lesson will improve your homeschool math lessons and help your students become better at calculations. This collection of worksheets will also help students understand the process using word problems. Answers are provided for each of the five worksheets on the second page for ease of grading. Before having students start on the worksheets, explain that when you borrow money, you have to repay the amount you borrowed as well as any added interest charges, which represents the cost of borrowing. In the same way, explain to students that when you lend money or deposit funds in interest-bearing accounts, you typically earn interest income for making your money available to other people. D. Russell Print the PDF: Simple Interest Worksheet No. 1 In this exercise, students will answer 10 word problems about calculating interest. These exercises will help homeschoolers learn how to calculate the rate of return on investments and illustrate how interest can accrue over time. Students will answer such questions as, "How much interest does a \$318 investment earn at 9 percent over one year?" Explain to students that the answer would be \$28.62 because 318×9 percent is the same as 318×0.09 , which equals \$28.62. Explain to students that they would have to pay this amount of interest in addition to repaying the principal, the amount of the original loan, \$318. D. Russell Print the PDF: Simple Interest Worksheet No. 2 These 10 questions will reinforce the lessons from worksheet No. 1. Homeschoolers and other students will learn how to calculate rates and determine interest payments. For this PDF, students will answer word problem questions such as: "If the balance at the end of eight years on an investment of \$630 that has been invested at a rate of 9 percent is \$1,083.60, how much was the interest?" If students are struggling, explain that calculating this answer involves only simple subtraction, where you subtract the initial investment of \$630 from the ending balance of \$1,083.60. Students would set up the problem as follows: $1,083.60 - 630 = 453.60$ Explain that some of the information in the question was extraneous and not necessary to solve the problem. For this problem, you don't need to know the years of the loan (eight years) or even the interest rate; you only need to know the beginning and ending balance. D. Russell Print the PDF: Simple Interest Worksheet No. 3 Use these word questions to continue practicing how to calculate simple interest. Students can also use this exercise to learn about the principal, rate of return (the net gain or loss on an investment over a specified time), and other terms commonly used in finance. D. Russell Print the PDF: Simple Interest Worksheet No. 4 Teach your students the basics of investing and how to determine which investments will pay the most over time. This worksheet will help your homeschoolers polish their calculating skills. D. Russell Print the PDF: Simple Interest Worksheet No. 5 Use this final worksheet to review the steps for calculating simple interest. Take time to answer questions your homeschoolers may have about how banks and investors use interest calculations.
